

FREERT CLOTHING BRAND - PLATFORM SHIELD

Project Handover & Feature Checklist

Project Type: Custom Next.js & Supabase Enterprise E-Commerce Platform

Delivery Date: July 26, 2026

DELIVERED FEATURES & ARCHITECTURE (A-Z)

1. Premium Next.js Frontend Framework

Custom storefront UI with smooth styling, navigation, mega menu, cart & wishlist system.
2. Supabase Serverless Cloud DB & APIs

Secure database tables, storage CDN for media uploads, and Row Level Security (RLS).
3. OTP System Sign-in Flow

Dual Verification (OTP verification system) for secure signup/login workflows.
4. Razorpay Payment Gateway Integration

Webhook-enabled payment processing verifying orders directly from client accounts.
5. Automated Inventory & Restock Engines

Variant creations engine (auto-create S, M, L sizes) and dynamic restock notification flow.
6. Live CMS & Admin Panel Manager

Home hero banners control (images/video sliders), categories management & order updates.
7. Automated Brevo Transactional Email Engine

Custom HTML responsive mailers for new orders, cancellations & verification alerts.
8. Professional SEO Setup

Automated XML sitemaps generation & robots.txt mapping to boost Google Search rankings.
